MIGCO, Fencing System

We, M. IQBAL GHAZI & PARTNER CONT. CO. - MIGCO specialize in the field of supply and installation of all types of Fencing Systems; we have executed many projects for various ministries and leading contractors. We have well qualified and experienced installation crew and are capable of undertaking large and small projects in any location of the kingdom. In addition, to the experienced crew, we have all the latest and required equipments & vehicles to execute any size of projects on time. Our clients are Saudi Aramco (All types of Aramco Fence), Ministry of Transport, Ministry of Defense, National Guard, Ministry of Interior, Ministry of Education, RSADF, Saudi Coasts Guards, STC etc. We have vast experience in installing Chain link Fence, Welded Mesh Fence, Barbed Tape Concertina, Highway Fence, SSDI, SSDII, SSDIII, Sports Facilities, Guard Rail System, 4 Ropes Safety Fence and Gabions, in addition to General Contracting.

Guardrail System

MIGCO added Guardrail System to the list of services they offered to transportation industry. Since we have partnered with general contractions and kingdom Saudi Arabia Agencies to provide expert installation of vehicle barriers on streets, high ways, parking and private projects. Our screws are well qualified to install complex guardrail system properly, safely, cost effectively and on time. We are committed to being the company you choose as a partner for your projects -- and the company that dedicated professionals want to work for.

Security Fence

MIGCO a ground-mounted, redeploy able security fence that combines the central concept of the Concertainer™ system with anti-climb mesh, to provide a temporary or permanent security fence.

MIGCO provides a rapidly deployed high-level security fence for the protection of critical infrastructure and assets. The security barrier can be built on undulating or sloping ground, anchored in place by readily available bulk bags

Partitioning Fence

A variety of facilities find that economical chain link fabric fencing materials are ideal for partitioning off interior spaces, providing secure enclosures, and other uses, especially for large interior spaces like warehouses and storage facilities. Our Minnesota fence installation and supplies company can help you create secure, interior fencing solutions that solve tough problems economically and effectively. Our modular, pre-framed panels, gates, and doorways let you create or change interior partitions and enclosures quickly.

Sliding Gates

MIGCO offer a full installation service if required on all type of works from private residential customers to large scale installations. Aprimatic MIGCO carry out all installations to the highest standards and built up a well established portfolio of electrical gate automations not only UK based but on an international basis. Due to the years of expertise our team of fitters are fully competent when it comes to installations maintenance and repairs of all Aprimatic motors and components.

MIGCO Network Solution

MIGCO Network Solution is one of the first in the industry to offer Networking and e-commerce applications. MIGCO understands that information technology is playing a vital role in industries and has been a leader in the use and development of IT solutions. We understand our clients requirements and services.

Our Major services are focused on Information Technologies and Telecommunication sectors. MIGCO has recognized the growing importance of IT industry for many years. Today, we are a leader in customer-focused to reflect the prominence of information technology for the companies.

MIGCO Network Solution is a total IT solution partner that focuses solely on businesses unique computing, networking and application needs. Serving hundreds of organizations across every major industry, the company helps it's clients achieve their business leadership objectives by lowering the cost and maximizing the performance of their information technology systems

Our main business areas as below:

- A. Networks / Telecommunication (Microsoft, CISCO, Juniper, Huawei).
- B. Security and surveillances
- C. Audio Visual Conferencing System
- D. Web Designing & Development

LAN / WAN Networking

We have experience in designing, implementing and maintaining LAN / WAN Networks, using trained and qualified Network / Systems Engineers.

We provide LAN/WAN Installation and Consultancy service including everything from the Category 5 / 6 // cable or Fibre Optic cable installation to IP Schematic Design and Router and Switches Configuration using hardware from vendors such as CISCO, HP, Dell, 3COM, APC, Draytek, Juniper and WatchGuard, to name but a few.

Wireless Network Solutions

Once you begin using wireless data, you'll wonder how you ever lived without it. Wireless data gives you the freedom to work from almost anywhere and gives you access to personal information when you are on the go. Whether the wireless system is accessing e-mail from an airport or receiving dispatch instructions as a taxi driver, you'll find it extremely effective to be able to maintain a data connection with a remote network from almost anywhere.

Security & surveillance

Video surveillance and security has moved to the forefront globally as a strategic tool in protecting corporate assets, the war against terrorism, crime prevention, and public safety. At the same time, video surveillance usage is increasing as a tool for traffic monitoring and local government security. The days of grainy and blurry analog CCTV systems have been replaced by advanced digital IP cameras and systems producing high-resolution, high-definition, real-time video.

Along with that new technology, the high-speed IP networking infrastructure enabling it is critical.

Audio visual System

One area MIGCO have excelled in is the design and installation of audio visual systems for corporate and entertainment venues. We provide clients with affordable and sustainable solutions across a broad range of services from concept to completion. Our unique strength is derived from a blend of specialist multidisciplinary creative and audio visual engineering skills and a passion for professional excellence..

Electrical, Instrumentation

MIGCO provides a full range of Electrical, Instrumentation and Telecommunications services primarily for core industrial sectors such as hydrocarbon industry. The company has grown to become a recognized in the Electrical and Instrumentation contracting field, providing and implementing cost effective, high performance engineered solution in Electrical, Instrumentation and Telecommunication works including installation and commissioning of HV, MV and LV Switchgear, transformers, substations, instrument control rooms and cabling works. Furthermore MEDGULF instrumentation team has successfully installed independent Fire and Gas Systems, DCS, PLC, PA / GA and other automation equipment.

MIOGCO strength is based on local experience accumulated over many years working in this field. The management and its resources are fully committed to customer satisfaction and all of our work is undertaken in strict accordance to the latest international standards.

Mechanical & Plumbing

MIGCO is a leading Mechanical & Plumbing Contractor and have executed many specialized mechanical and cross- country pipelines projects for a wide range of local clients in the Kingdom Saudi Arabia. The safety & quality we apply to our works have enabled us to establish long term relationship with our clients.

Our welders, pipe fitters, workers and equipment crews have high skilled technical expertise and are supported by supervisors and Engineers that possess a complete knowledge of mechanical, plumbing & piping requirements.

We thoroughly understand the complexity and difficulty of projects that utilize a wide range of piping materials, often installed in confined areas and sometimes under extremely difficult and challenging environmental conditions.

MIGCO provides a full range of welding, cutting, transporting, and assembly operations for fabrication of pipes in nearly all diameters and wall thickness using the latest technology and processes.

Transforming your working environment...
